

UQFC - U14-18 - Recovery Runs - Session 1

Category: Academy: Counter/Reactive pressure

Difficulty: Difficult

Liam Mulcahy, Brisbane, Australia

Description

Main Principle: Recovery Runs

Behaviour: Organise defence behind the ball

Team Model Moments:

When our attack finishes and the opposition are counter-attacking

If the opposition has kicked long down the pitch

When the opposition are in our half of the field (everyone behind the ball)

Rondo - Transfer (20 mins)

Recovery Rondo 7v2 (4v2)

Area - Rectangular

Time - 3 x 4 minutes with 2 x 30-second Speed Agility exercises between sets

Action - Recovery Runs

Behaviour - Quickly getting back behind the ball with the team

Rules:

- Normal rules with defenders and the bibs

- Players collect balls and control the tempo of the rondo

- Attackers must play through the middle player to transfer to other side of the area

- When ball is within a half, always must be 5v2.

Progression: (after first 4-minute set)

- Attackers can play through, around or over to the other side of the area at anytime

- Defenders get back behind the ball before chasing to steal it back

Speed Agility - First Round

- Return the bib, place 6 bibs along the yellow cone line, divide players into groups in each rondo and have them line up along each red baseline. Both groups run in and, at the same, steal a bib and return it to the red baseline. The group with the most win play this three times

Speed Agility - Second Round

- Same game as above, but now when bibs are on the red baseline, teams can steal from the opposition line, but if they are tagged on the way back to their baseline, they must drop the bib, play this part for 15 seconds

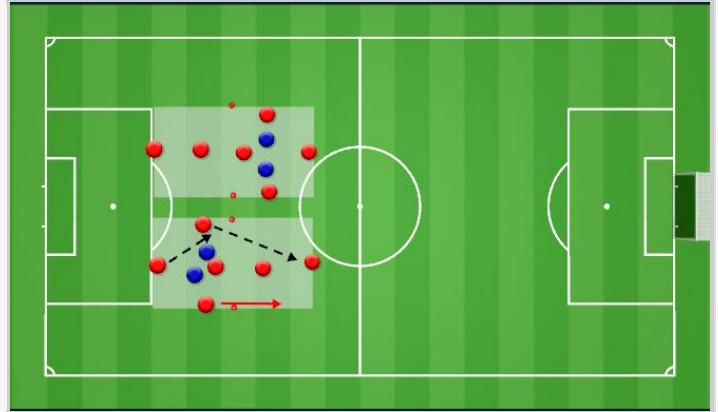

Coaching:

Observe the action of the player recovering together with his teammate

Do not coach when the rondo is on or talk for longer than 30 seconds in-between the rondo sets

Water Break:

Duration 4-minutes

Positional Play - Recovery Runs (25 mins)

Positional Play (Recovery Runs)

Area - Half-size pitch

Time - 3 x 6-minute sets with a 2-minute recovery in between

Action - Recovery Runs

Behaviour - Quickly getting back behind the ball with the team

Rules:

- Play starts with the CB (3/4) passing to the other CB, then playing into our 7 or 11, who has come inside (alternate)
- Our 2 or 5 on that side high-speed run to the goal line to collect the pass from our 6 and deliver a cross
- Arriving inside the box (flooding) for the cross is our 7,8,9,10,11, with the opposite side fullback (2/5) arriving on the edge of the 18 yard box
- GK or defenders clear the ball over the halfway line
- Once the ball is cleared, a goal is scored, or the ball goes out of play, all attacking players perform recovery runs past the poles (marked on the sideline)
- Swap out the four black defenders for the red each set
- Red defenders are passive until the cross is delivered
- Use one blue CB or other GK if short on player numbers
- Full-back that delivers the cross recovers inside to midfield after the recovery run

Progressions:

- First set, all players recover to their unit pole
- Second set coach shouts out the pole for all players to recover to
- In the third set, all players recover to the halfway line
- These recovery runs should be performed at 80-100%, with all recovering together

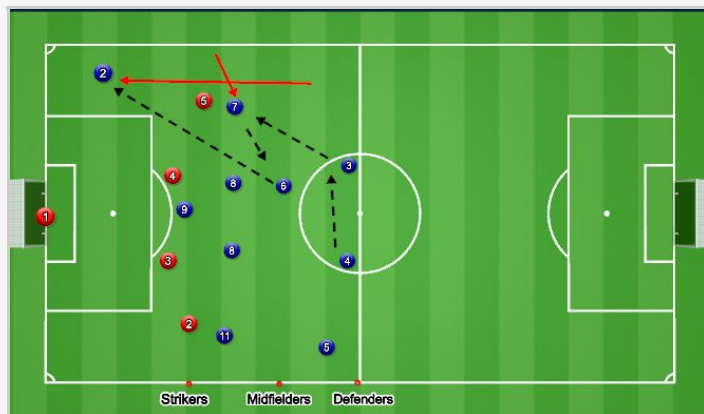

Coaching:

- Observe the recovery action and player behaviour to quickly get back to the pole line (behind the ball)
- Motivate the players not recovering (outsiders)
- Maintain exercise organisation, and the orange defenders start positioning (realistic to the blues with the ball)

Any player, not recovery running in our team model is not acceptable

Water Break:

6 minutes

Small Sided Games (30 mins)

Small-Sided Games 4v4 (Four Teams)

Area - 30 yards by 20 yards

Time - Three Sets of 4 minutes (2 minutes rest), 4.5 minutes (2 minutes rest), 5 minutes (2 minutes rest),

Action - Recovery Runs

Behaviour - Quickly getting back behind the ball with the team

Rules:

- Normal Game Rules except kick in or dribble in on the side and goal kicks, no corners.
- World Cup Style (3 group games + Finals)

Progression:

- If a team scores and all the opposition players have not recovered (yellow cones), they get a double goal
- Outside players must also recover, as above

Coaching:

- Observe what players are not recovering to get back behind the ball with their team
- Call out these players and instruct them to recover
- If adjusting player numbers, place one player in each side area instead and rotate out each round
