

## UQFC - U14-18 - Trapping - Session 2

Category: Academy: Mid-block and press

Difficulty: Difficult

Liam Mulcahy, Brisbane, Australia

### Description

Main Principle: Trapping

Behaviour: Force the opposition into a vulnerable position.

Why? To create uncertainty when the opposition builds out - Control opposition build out destination.

### Moving Rondo (15 mins)

**Moving Rondo 5v3** (adjust outside players if needed)

Area - Circular shape

Time - 3 x 4 minutes with 2 x 30-second Speed Agility exercises between sets

Action - Setting traps

Behaviour - Surrounding the ball/opponent

Rules:

- The ball is never out, and players can go anywhere on the field but must remain connected as a group

- Defenders hold bibs and drop when stealing it back, only

- If a new defender catches the bib, then the original defender stays in again

- Defenders steal the ball, drop the bib and play

Progressions: (after 4-minute set)

- The coach shouts GO, and the ball player kicks it long anywhere on the pitch. All players must now recover the ball together, and the defenders can set a trap on the player with the ball

Speed Agility - First Round

- Bib Grab, in rondo numbers, the outside players surround the defenders who have tucked the bibs into the back of their shorts. They must steal all bibs, work together, and play two rounds

Speed Agility - Second Round

- Big Bib Grab, rondo groups merge into one but play as separate groups within the larger group. Once one group has collected their bibs, they can now go after the other groups and the outside player who collects the last bib of any team wins, play two rounds

Coaching:

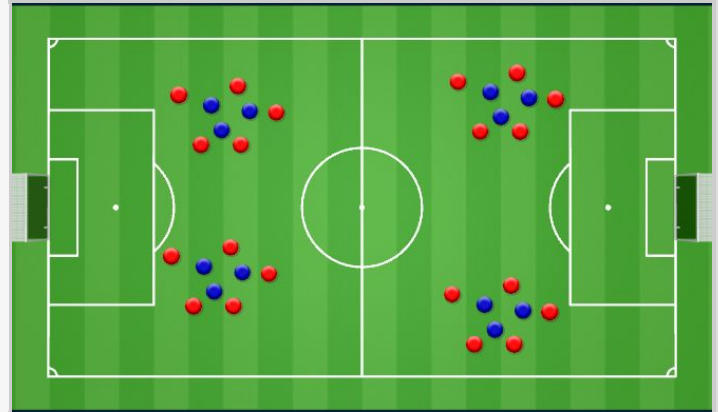

Observe the action of setting traps (three players together)

Observe the architecture of both defenders and outside players remaining connected

Encourage the rondos to move anywhere across the full pitch

Water Break:

Duration 4-minutes

## Game Training (25 mins)

### Game Training 8v8+GK

Area - Half-size pitch

Time - 25 minutes (no breaks)

Organisation - Red 9 and one of blue 3/4 locked in the centre circle

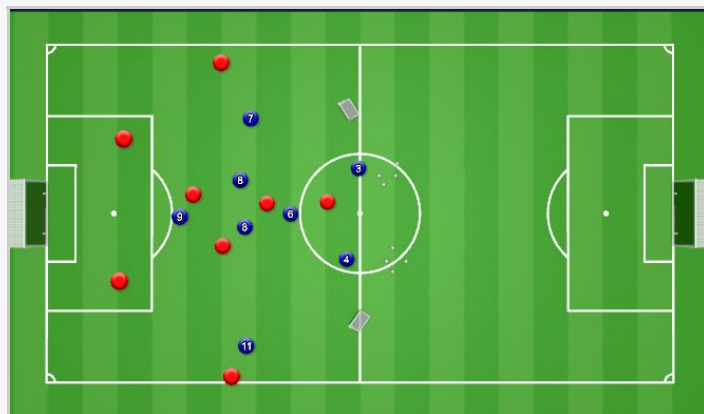

Team Task:

Today's session is all about remaining in our defensive organisation, creating indecision, and then executing traps to steal back the ball and play forward to score

Player Tasks:

**9** be positioned in front of the opposition CBs and mirror them, do not chase them

**9,10,11 or 9,8,7** set traps on opposition FBs as they receive from the CBs

**6** compact inside, and the 2/5 swing forward at this moment to compact around the trap (architecture)

**Opposite FB**, tuck into the centre of the midfield next to our 6

**3 and 4** compact forward (outside centre circle) but be side on ready to drop and recover

All player's task, play forward when you win the ball

Organisation:

-Starting Position with Red team GK (manage this)

-Allow natural play and restarts (throw-ins and blue CBs starting play)-

-Maintain red team organisation to replicate the moment for the black team

-Ensure the blue team's architecture when setting and executing traps

Coaching:

-Set your team tasks using open questioning (guide them to the purpose of the session)

-Player task interventions use task (guide), ask (questioning), show (demonstration) and tell (over the top) interventions

-Interventions should be 10-20 seconds (be concise) and use the ball in the picture

Water Break:

Duration 6-minutes

## Game (25 mins)

### Medium Size Game 8+GK v 8+GK

Area- Half-size pitch length and full width

Time - 30 minutes (2 x 15-minute halves)

Rules - Both team score into the big goals

Organisation - Both teams set up as 4-1-3

Coaching:

-Observe the setting of the traps (three players arriving together on time)

-Observe team architecture when executing the traps (swing around)

-Observe the aggressive behaviour when a pass is played into the kill zone (middle area)

-Coach over the top and encourage forward actions when black steal the ball

## Set Plays (15 mins)

### Attacking Corner (Pods)

Organise with another team who is working on defensive set plays.

#### Rules:

- Adjust attackers and defenders (remain realistic)
- Play only stops when a goal is scored (either team), or the ball is out of play
- Defending team clear the ball over the marked line or hit a mannequin to score

#### Details:

- Flat inswinging delivery (head height) across the six yard line
- The #9 runs straight at the GK just before delivery contact (disrupt)
- Pod groups can organise to run front, back or at the goal themselves (mix up)
- Change the Pod starting positions or group together (mix up)
- The runs and starting positions should change for each corner
- The GK and defenders compact high to trap/invade the opposition (**do not change this**)
- One of the two defenders can also join in to be more aggressive

#### Water Break:

4 minutes

Use divergent questioning about the Pods corner
