

UQFC - U9-U13 - Recovery Runs - Session 2

Category: Academy: Counter/Reactive pressure

Difficulty: Moderate

Liam Mulcahy, Brisbane, Australia

Description

Principle: Recovery Runs

Behaviours: Sprint back behind the ball - Recover Defensive Organisation.

Why? Minimise opposition space and outnumber the opponent.

Rondo - Recovery Transfer (20 mins)

Recovery Rondo 2v1 (transfer)

Area - Rectangular (8x5m) with a 3m endzone on each end.

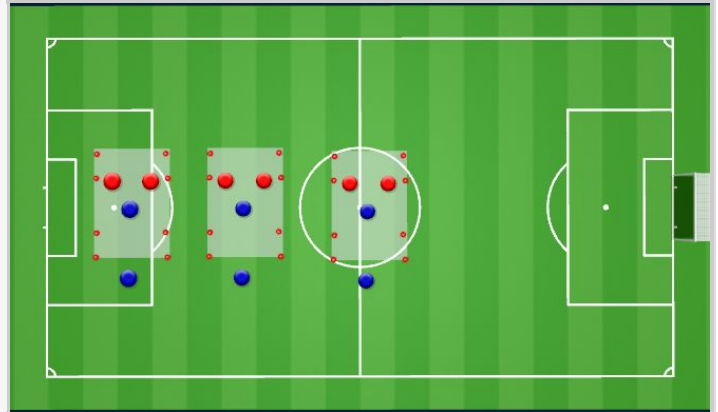

Time - 6 x 90 sec with 2 x 30-second Speed Agility exercises between sets

Action - Recovery Runs

Behaviour - Quickly getting back behind the ball with the team

Rules:

- 2v2 with always a 2v1 in-possession.
- Score a point by driving into the endzone.
- When a point is scored, the person who scored becomes the defender and the long defender is joined by the resting player.
- Same applies when the ball is out, closest attacking player to the ball being out or loss of possession is in as defender.
- Players collect balls and control the tempo of the game.
- After 3 rounds, if the defender successfully retains the ball, the resting defender can join to become 2v2 until a goal is scored, when same rules apply.

Speed Agility - First Round

Cone Steal, in twos face each other, and place the cone on the grass between you when ready, one player grabs the cone and runs away, and the other player has to recover it back inside 5 seconds, play two rounds

Speed Agility - Second Round

Turn n Run, all players inside the yellow area jogging and bumping into each other, on GO (shouted by a player then pass on) players must turn from the direction they are facing and run to one of the red end lines, first players over each one wins, play three rounds.

Coaching:

When losing the ball, react quickly to influence the next play.

Quickly **swarm** the ball if you think you can win it. IF not, recover backwards and prevent the opposition from progressing the ball forwards.

Encourage these with positivity and use the keywords **SWARM, CHASE, AND RECOVER**

Water Break: 4 min

Connect with players and ask questions about what recovery runs are.

Cross the River - Whole Team (25 mins)

Cross the River Positional Play

Area - Rectangular with 2x20x30m zones with 5m channel in between.

Time - 3 x 3 minutes w/ set defenders (1 game continuous 8 min with rotating teams).

Behaviour - Quickly getting back behind the ball with the team

Rules:

- Three teams, defending team, press the ball with 2 defenders, the other 2 defenders stay within the middle zone.

- When the defenders win the ball, they try and score in the goal from the side it came from. The team who touched the ball last before going out, now becomes the defending team, and the previous defending team replaces them.

- Attacking teams aim to transfer from one side to the other for a point, 1 person from the opposite attacking team can go into the river to help support the other team.

- A defending team will stay in for a maximum of 60 seconds, once done, the team who has been in the least, become defenders.

Coach to play ball immediately in to encourage quick recovery and transition moments.

Coaching: Use a mixture of in, over or dead-ball and use player centred techniques

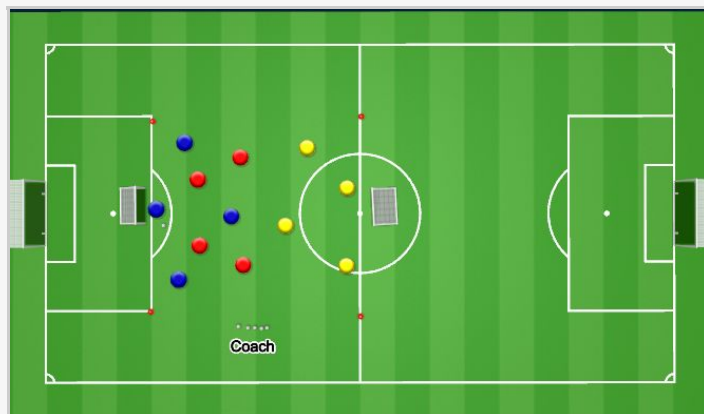

Observe how quickly they are transferring from one square to another.

When do you chase to win the ball back and dribble across the top-line or when do you recover to prevent forward play?

Working collective (architecture) to make sure when recovering, players are connected to prevent opposition from playing from them.

Water Break:

Duration 4 minutes

Game (30 mins)

Medium Sized Game 5+GK v 5+GK

Area - full width and length of half-sized pitch

Time - 13 minutes (2 minutes rest), then 12 minutes (2 minutes rest)

Action - Recovery Runs

Behaviour - Quickly getting back behind the ball with the team

Rules:

- Both teams score into the big goals

- Everyone except GK must be over halfway before you can score (remove rule as progression).

Coaching:

Encourage players to get behind the ball to stop opposition from flooding the box.
