

UQFC - U9-13 - Trapping - Session 2

Category: Academy: Mid-block and press

Difficulty: Moderate

Liam Mulcahy, Brisbane, Australia

Description

Main Principle: Trapping

Behaviour: Force the opposition somewhere we can win the ball

Why? To prevent the opposition from playing forwards, to win the ball and score goals.

Moving Rondo (20 mins)

Moving Rondo 4v2 (adjust outside players if needed)

Area - Circular shape

Time - 3 x 4 minutes with 2 x 30-second Speed Agility exercises between sets

Action - Setting traps

Behaviour - Surrounding the ball/opponent

Rules:

- The ball is never out, and players can go anywhere on the field but must remain connected as a group

- Defenders hold bibs and drop when stealing it back, only

- If a new defender catches the bib, then the original defender stays in again

- Defenders steal the ball, drop the bib and play

Progressions: (after 4-minute set)

- The coach shouts GO, and the ball player kicks it long anywhere on the pitch. All players must now recover the ball together, and the defenders can set a trap on the player with the ball

Speed Agility - First Round

- Bib Grab, in rondo numbers, the outside players surround the defenders who have tucked the bibs into the back of their shorts. They must steal all bibs, work together, and play two rounds

Speed Agility - Second Round

- Big Bib Grab, rondo groups merge into one but play as separate groups within the larger group. Once one group has collected their bibs, they can now go after the other groups and the outside player who collects the last bib of any team wins, play two rounds

Coaching:

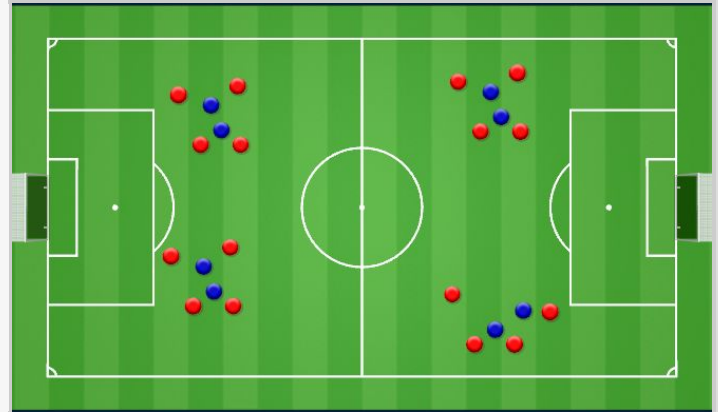

- Observe the action of setting traps (three players together)

- Observe the architecture of both defenders and outside players remaining connected

- Encourage the rondos to move anywhere across the full pitch

Water Break:

Duration 4-minutes

Positional Play (25 mins)

Positional Play (Attack vs Defence)

Area - Half-size pitch

Time - 20 min (feedback during natural rest break) - Swap

direction after 10 min

Organisation - 5v5 + GK - Place additional players accordingly

Organisation:

-Red team GK start

-Allow natural play and restarts (throw-ins and black CBs starting play)

-Blue team win the ball and score in the big goal.

-Red team score in the mini goals.

Team Task for the defenders (Blue):

Today's session is all about trapping the opponent to prevent forward so we can steal the ball and create a goal scoring opportunity.

Player Tasks (Blue):

-Can we compact in the middle to force the ball into a wide area.

-When the ball goes wide, can we all swing across to meet the ball.

-If you're in front of the ball, can you look to apply **pressure**

-If you're near the ball, can you provide **cover** to the player pressuring the ball to prevent forward play and predict where the ball may go next.

-If you're not near the ball, can you follow your teammates to prevent the opposition playing between us. **Balance**.

Progressions:

Blue - Win the ball and score within 8 seconds for a triple goal.

Red - Score without the opposition touching the ball for a triple goal.

Coaching:

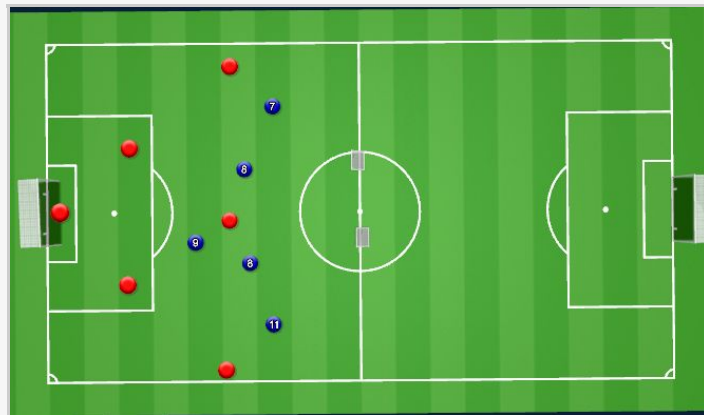

Set your team tasks using open questioning (guide them to the purpose of the session)

Player task interventions use task (guide), ask (questioning), show (demonstration) and tell (over the top) interventions

Interventions should be 10-20 seconds (be concise) and use the ball in the picture

Water Break:

Duration 6-minutes

Game (30 mins)

Medium Size Game 5+GK v 5+GK - Adjust with Numbers

Area- Half-size pitch length and full width. Adjust dependent on numbers.

Time - Two matches of 10 minutes

Rules - Both team score into the big goals

Organisation - Both teams set up as a 2-1-2

Coaching

-Observe the setting of the traps (three players arriving together on time)

-Observe team architecture when executing the traps (swing around)

-Observe the aggressive behaviour when a pass is played into the kill zone (middle area)

-Encourage forward actions when black steal the ball
